24k Cigar Pen Kit

For use with the following:

213-8001

BEFORE ASSEMBLY: Read the assembly instructions completely, then layout the project parts according to the drawing. We strongly recommend using a vise or clamp with wooden jaws when assembling to avoid damaging the parts.

ASSEMBLY:

1. Press the tip into the smaller end of the long barrel.
2. Press the coupler into the opposite end of the same barrel. Use a press block (see fig. 1) to prevent damaging the threads.
3. Insert the ink refill into the long barrel, then screw the transmission onto the coupler.

4. Press the clip/cap into the smaller end of the short barrel.
5. Slide the trim ring onto the trim cap, then press them into the opposite end of the short barrel.
6. Press the short barrel onto the transmission to join the two halves. Your pen is now complete.
